The following is an examiner's statement of reasons for allowance:

The prior art teaches various methods and systems for authenticating users via proxies, privilege servers, gateways, service servers etc. using passwords, tickets, tokens, and the like. What is missing from the closest prior art is authenticating the user at the head end server when the packet is sent from the privilege server to the head end server, within such a setup having a user privilege server proxy, privilege server, head end server, web adapter, and service server.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
